

S.Q.A.N. Executive Audit Report

Cryptographic Asset Findings & Remediation:

File: Dockerfile (Line 5)

Artefact: TLS 1.0 | Risk: Critical

Remediation: Upgrade to TLS 1.3

File: legacy_crypto.c (Line 6)

Artefact: DES | Risk: Critical

Remediation: Deprecate immediately, upgrade to AES-256-GCM

File: legacy_crypto.c (Line 8)

Artefact: DES | Risk: Critical

Remediation: Deprecate immediately, upgrade to AES-256-GCM

File: legacy_crypto.c (Line 11)

Artefact: RSA | Risk: Critical

Remediation: Migrate to ML-KEM-768 (NIST FIPS 203)

File: payment_service.java (Line 6)

Artefact: ECC | Risk: Critical

Remediation: Migrate to ML-DSA-65 (NIST FIPS 204)

File: payment_service.java (Line 11)

Artefact: ECC | Risk: Critical

Remediation: Migrate to ML-DSA-65 (NIST FIPS 204)

File: payment_service.java (Line 11)

Artefact: SHA-1 | Risk: High

Remediation: Deprecate immediately, use SHA-256 / SHA-3

File: payment_service.java (Line 12)

Artefact: ECC | Risk: Critical

Remediation: Migrate to ML-DSA-65 (NIST FIPS 204)

File: secure_module.py (Line 6)

Artefact: AES-256 | Risk: Safe

Remediation: Retain AES-256-GCM (Quantum-Resistant)

File: vulnerable_app.py (Line 6)

Artefact: RSA | Risk: Critical

S.Q.A.N. Executive Audit Report

Remediation: Migrate to ML-KEM-768 (NIST FIPS 203)

File: vulnerable_app.py (Line 11)

Artefact: MD5 | Risk: Critical

Remediation: Deprecate immediately, use SHA-256 / SHA-3
